intelia's Google Cloud service offerings

Enterprise Data Strategy
Define where you want your data to take you. We help develop your enterprise Data Strategy to articulate your journey and enable you to achieve your data vision, goals and objectives.

Data & Analytics Accelerator
Understand your data, reporting and analytics environment in detail. We can provide a clear picture of how and where you can drive more value from your existing data assets.

Leverage GCP's Advanced Analytics
Unlock the power of GCP's Machine Learning and AI capabilities to power your insights whether they be analysing unstructured data to find patterns or using AutoML to recognise safety concerns in your streaming video solutions.

Engineer your Data & Analytics Solution
Our experienced team can help you implement, integrate and automate GCP products and services. We make your data available for your business to consume and visualise for actionable insights.

Managed Support Services
We don't simply press install and leave. Our team are ready to support your organisation through a diverse range of managed services.

Contact us for a no obligation chat about how we can assist with GCP implementation.

Future Proof. Powerful. Innovative

Google Cloud

We're specialist, We're intelligent, We're authentic
Bring in your ideas, we have the technology and skills to make them happen and bring them to reality!

For the past 20 years, Google has been building the fastest, most powerful, and highest-quality cloud infrastructures on the planet. Google Cloud Platform is built from the same backbone that Google uses themselves - for several high-traffic and global-scale services, including Gmail, Maps, YouTube, and Search. The size and scale of these services are globally unique – and so is Google's Cloud Platform.

In today's world, businesses thrive on delivering unique insights and superior customer experiences. That's why cloud is the choice of businesses focused on thriving now and growing in future.

Leverage the advanced analytics capabilities, performance and cost benefits that come with Google Cloud Platform and get your business in the innovation hot seat.
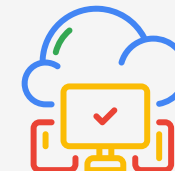

Google Security · **Embedded Intelligence** · **Easy to Manage** · **One Google** · **Multi Cloud** · **Managed Open Source** · **Scalable Infrastructure**

Data management
Migrate and manage enterprise data with security, reliability, high availability and fully managed data services

Artificial intelligence
Add efficiency to your business with embedded AI and machine learning capabilities

Application modernisation
Develop and run applications anywhere, using cloud-native technologies like containers, serverless and service mesh

Smart Analytics
Generate instant insights from data at any scale with a serverless, fully managed analytical platform

When you partner with Google, you're getting a technology base for your business designed to be open, reliable, and innovative. All of this is wrapped in Google Cloud's world-class security.

Scale with reliability and confidence
Google Cloud sets a standard for reliability with 99.5% reliability and no scheduled downtime, helping ensure your business is always on with a continuous high level of service.

Word leading data capability
From BigQuery to Dataflow and Data Studio, GCP provides a single platform to handle your data needs whether they're foundational or you're using advanced machine learning capabilities.

Accelerate innovation
GCP is an easy-to-use platform with smart analytics and artificial intelligence built in, making these technologies more accessible and easier to deploy across your organisation.

Secure & Intelligent
GCP is an easy-to-use platform with smart analytics and artificial intelligence built in, making these technologies more accessible and easier to deploy across your organisation.
